REPUBLICAN IN POLITICS.

FRIDAY, MAY 17, 1907

Every little country village has an ambition to become a trade center and a boom city, with no special natural features or geographical advantages. Under such conditions what is most needed is some enterprise on the part of its local

publishing too much of this kind of stuff.

Here's a new problem handed us by one of our readers this week that lays Ann's age in the shade: If John Jones had seven dogs and every dog is white; and fourteen cats come chasing round, each one as black as night, and each two cats has eighteen lives less three destroyed by rats—how many lives must three dogs take before they kill eight cats?

Most men who own a watch think they know all about it. They have the number fixed in their memory in case it is stolen. They could probably pick it out from 50 other watches with their eyes shut. But how many men know that their watch is a compass and will tell north from south as accurately as it will tell the time of day? Stanley, the explorer, did not know it until he had groped his way through the dark continent and met a Belgian sailor on the coast. Every watch is a compass. If you point the hour hand to the sun the south is exactly half way between the hour and the figure XII to the dial. Suppose for instance, it is 4 o'clock. Point the hand indicating 4 to the sun and the XI on the watch is exactly south. If it is 8 o'clock point the hand indicating 8 to the sun and the figure X on the dial is due south. No man need get lost if he carries a watch.

It is more fun to see a man read a puff on himself in a newspaper than to see a fat man slip on a banana peel. The narrow minded man reads it over seven or eight times, and then goes around to appropriate what copies he can. The kind hearted man goes around to the office and pays what he owes. The successful business man who advertises regularly and makes money by it, immediately starts out to find the editor and the two walk silently down the street and the business man takes sugar in his and they both eat a clove or two and life is sweeter and peace settles down on their hearts for moments. Such is the experience of a mustard seed that falls on different ground.

Harve Cromer was here this week from Chest Bridge and he proved to our satisfaction that there is something in the weather prophesy of the ground hog. Three weeks ago, he says, his boys dug up a ground hog near their home and the little animal was curled up sound asleep and it has remained in that condition ever since. We anxiously await next Thursday's coming when the six weeks hibernation of all ground hogs will come to an end. The ground hog has long been looked upon with suspicion but we have every reason to believe that reports from the Cromer homestead next week will remove all doubt from the minds of those who do not believe in the predictions of the animal.

Before the Freedom of the Press.

Many of the restrictions that hampered the influence of the press remained in force until the close of the eighteenth century in England. It was not till that period that newspapers obtained the right to criticise the policy of ministers and of the king. Mr. Walter, the first editor of the London Times, was prosecuted for censuring the duke of York. He was sentenced to pay a fine of $250, stand in the pillory for an hour, be imprisoned for a year and give security for his good behavior for seven years. The order with regard to the pillory was canceled, but he had to serve his term in jail.

"We haven't any further need of your services," said the managing editor of a city daily to a reporter who had been at work only a week.

"That's rather sudden, ain't it?" replied the startled reporter. "Haven't I done all I had to do?"

"You have done the work, but not properly, sir."

"What's wrong?"

"Well, you wrote up Mrs. Parvenue's ball, and there was not a word about it being a brilliant affair."

"That's just what it wasn't."

"The lady, sir, takes several copies of this paper, and her husband has his printing done in our office, and ordinary common sense should teach you to understand your duties under the circumstances."

"But—"

"No excuse is necessary, sir. Then you brought in an article on the arrest of young Mr. Fresh for drunkenness. His father is one of our patrons, and we have a sufficient independence to disregard the wishes of the curious public to get an item of news when our patrons are interested in its suppression."

"I understand—"

"No you don't, for you wrote Mr. Jones's obituary without saying he was a distinguished citizen, of large influence, and a man of great goodness of heart."

"I thought he was another kind of—"

"You mustn't think. The independent spirit of the press is not to be governed by reportorial thought, sir. Did you think when you wrote of Miss Angeline Shoddy's departure to the seaside without referring to her as the charming and accomplished daughter of one of our most select families?"

"Who said she was the—"

"Do you have to hear what other people say in order to know your business? Who told you that Mr. Bottle, the councilman, was a rough? Don't you know his influence is worth money to the paper?"

"I wasn't aware that—"

"Of course you were not aware of anything. If you were, you might be useful to us. No, sir; you are not the kind of a man we need. We want a man not to know what he knows, and know what he does not know. The liberty of the press is not to be trifled with by irresponsible reporters who think, nor is its freedom to be restricted by young men who let the actual facts in a case interfere with the requirements of the occasion. You can get your pay, sir, by calling at the office."

An Old Greeley Anecdote.

The following, which is characteristic of Horace Greeley, is good enough to reprint:

Sfiortly after the passage of the fourteenth amendment, a movement in which Mr. Greeley had taken considerable interest, a large

stood by and mantained our Government as a constitutional democratic representative republic.

If the Republican party shall be defeated in 1884 it will break up and go to pieces, because it has no permanent fundamental principles upon which the Government was founded to hold it together. But the Democratic party, if defeated in 1884, will still continue and cling to its principles as long as there is a possibility of recovering and maintaining popular government in this country. The opposing parties to the Democratic party have never been permanent, because not held together by the true principles of popular government, which is the Government of the American people. The Federal party lasted a little over twenty years and then disbanded. Its successor, the National Republican party, lasted but a few years. The Whig party lasted some sixteen years and then broke up. The Native American party and the Know-Nothing party were ephemeral and humbug parties. The Abolition party continued until merged into the present Republican party and until slavery was abolished. And there is nothing new to keep the present Republican party together but the cohesive ties of power and public plunder.

The Democratic party, therefore, is the only permanent party founded on the genuine doctrines of our Government.—*Washington Post.*

WHY ANDREW JACKSON DECLINED A SARCOPHAGUS.—At the meeting of the board of city trustees of Philadelphia, Wednesday the report of Vice-President Gregory, of Girard College, in regard to the ancient Roman sarcophagus recently discovered in the cellar of the college was received. The sarcophagus will remain in the college museum. It was presented to the college by Commodore Elliott in 1838, and when an investigation of the records of the council of this city was made the following letter from Andrew Jackson was found, together with Commodore Elliott's letter presenting him with the sarcophagus. In this letter the Commodore said:

"I pray you, General, to live on in the fear of the Lord, dying the death of a righteous man soldier. An Emperor's coffin awaits you."

The following was Gen. Jackson's reply:

"With the warmest sensations that can inspire a grateful heart, I must decline accepting the honor intended to be bestowed. I cannot consent that my mortal body shall be laid in a repository prepared for an emperor or a king. My Republican feelings and principles forbid it. Every monument erected to perpetuate the memory of our heroes and statesmen ought to bear evidences of

"Yes'm."

"I didn't know as they 'lowed it," she exclaimed, "but I was determined on it. When I left home I had my mind made up that I'd either register or—"

"Put your name right down on this sheet of paper," interrupted the clerk.—"You needn't even give your age."

"I needn't! Well, sunthin' wonderful must have happened all at once. I guess you men have found out that us women are of some account after all. I expected I'd have to jaw and tear around, and perhaps use a weapon, and I'm a leetle disappointed."

Rev. W. E. Miller is holding a protracted meeting in the M. E. Church at this place. Considerable interest is manifested. Rev. David Bush, P. E., delivered two very able sermons on Sunday to large and attentive congregations.

Mrs. Spencer, an aged and respected lady, mother of Mr. G. W. Spencer, died of consumption at her home near here on the 19th instant.

On yesterday evening, between the hours of 6 and 7 o'clock, Mr. F. A. Renick was called from his fireside by the dread alarm of fire. Rushing from out his house he discovered that his large barn, two hundred yards distant, containing 15 head of fine blooded cows, 1 fine blooded bull, 2 calves, 21 tons of hay, 100 bushels of wheat, 800 dozen of oats, 1 threshing machine, 2 hay cutters, 2 cultivators, forks, rakes, etc., was in flames. He, with others, hastened to the burning building only to find that the devouring flames were beyond control. Access to the building was impossible, save by one door, which was overlooked in the excitement. All efforts to save anything in the building proved futile. The great light drew many of Mr. Renick's neighbors to the scene of the fire, but they could do nothing but stand and hear, with aching hearts, the roaring flames, falling timbers and piteous moans of the cattle. Two out-buildings near by, containing machinery, saddles, harness, etc., were also burned. Most of the machinery was saved, but 5 sets of harness, 1 side-saddle, 3 men's saddles, check lines, and sundry articles were destroyed. A granary, in which a large quantity of grain was stored, was saved by Mr. Wallace Beard and G. W. Spencer, who deserve great credit for their well directed efforts. The total loss, as estimated by Mr. Renick, is near $3,000. It is thought that the fire was caused by incendiarism. No clue, however, to the guilty party or parties. Mr. Renick has the heart-felt sympathy of the entire community in his great misfortune.

The History of Greenbrier County.

H. H. Hardesty & Co. propose to compile and publish an accurate history of Greenbrier county from the time of the Red Man down to the present year 1883, and incorporate the same in their valuable work, the Historical and Geographical Encyclopœdia. This history will be prepared by competent historians, who will get the facts and data from the best and most authentic sources. These will embrace the county's early settlement and growth, its pioneers, its improvements, its topographical features, its resources, &c., a history sparkling with scene and incident, which, if not recorded and preserved in some permanent form, will be lost to the descendants of the men and women who have played prominent parts in the history of the Virginias. This valuable work will be so localized and adapted to our county as to make it peculiarly valuable to our people. Several of their men are at present working in our county gathering pioneer recollections.—These gentlemen are recommended to us by many of Mason and Kanawha counties' best citizens, where they have been similarly engaged for the past year. Surely this work would be an interesting work to our children and future generations. Such an enterprise should receive encouragement from our best citizens, and by so doing place in the hands of our children the history of the brave men and women who suffered so many hardships for the comforts we now enjoy.

Rules for Keepers of Sheep.

1, Keep sheep dry under foot with litter.—This is even more necessary than roofing them. Never let them stand or lie in mud or water.

2, Take up lamb bucks early in summer, and keep them until December following; when they may be turned out.

3, Count every day.

4, Begin graining with the greatest care, and use small quantities at first.

5, If a ewe loses her lamb milk her daily for a few days, and mix a little alum with her salt.

6, Let no hogs eat with the sheep in the spring, by any means.

7, Give the lambs a little mill-feed in time of weaning.

8, Never frighten sheep if possible to avoid it.

9, Sow rye for weak ones in cold weather, if you can.

10, Separate all weak, thin or sick ones from those strong in the fall, and give them special care.

11, If any sheep is hurt catch it at once and wash the wound, and if it is fly-time apply spirits of turpentine daily, and always wash with something healing. If a limb is broken bind it with splinters tightly, loosening as the limb swells.

12, Keep a number of good bells on the sheep.

13, Never let the sheep spoil wool with chaff or burs.

14, Cut tag-locks in early spring.

12, Keep a number of good bells on the sheep.

13, Never let the sheep spoil wool with chaff or burs.

14, Cut tag-locks in early spring.

15, For scours give pulverized alum in wheat bran; prevent by taking great care in changing dry for green food.

16, If one is lame examine the foot, clean out between the hoofs, pare the hoof if unsound, and apply tobacco with blue vitriol boiled in a little water.

17, Shear at once any sheep commencing to shed its wool, unless the weather is too severe, and shave carefully the pelt of any that die.

18, Have at least one good work by you to refer to. This will be money in your pocket.

THE STRONGEST MAN.—Professor R. A. Proctor found at Reno, Nev., a man who claims to be the strongest man in the world. His name is Angela Cardella. He is an Italian, aged 38, and stands five feet ten inches in height, weighing 138 pounds. His strength was born with him, for he had no athletic training. He differs from other men chiefly in his osseous structure. Although not of unusual size, his spinal column is double the

Riding a Mule.

I have spoken to Judge Farrar. His ancestors owned the land near Dutch Gap, and his wife was a Miss Bullock, of Lynchburg. Nearly every Southerner I meet out here is more or less related to Virginia. The Judge, as I have intimated, is charming company. Among the good things he told us was the story of a friend of his who attempted one night to drive a stray mule out of his yard. Arrayed in that elongated garment which boys abhor and men delight in, he arose from his bed, descended to the yard, opened wide the front gate, and began to "shoo" the mule, his wife looking on from the chamber window. Mr. Mule declined to be "shooed." His wife began to laugh.

Vexed by the mule's mulishness and his wife's laughter, the good man crept softly up to the animal, and with a sudden leap, mounted him, expecting to ride him promptly out of the yard. But the astonished mule took off around the house, the night-shirt flapping and cracking in the cold air. The faster the mule went the louder the shirt cracked, and the louder it cracked the faster he went. Around and around and around they went, the shirt flapping and cracking and splitting, the man clinging for dear life with his legs and vainly trying to hold him back by the mane—his wife screaming with

then he hove in sight again.

He was gone again, but the next moment he was back.

"Think you could open a bottle of porter with your teeth, if I would throw it to you?"

He vanished like a meteor.

"Got a cold goose in the sideboard; couldn't you carve it with one hand and hold on with the other?"

"Mary," cried out the exasperated man, "you are the most infernal, unfeeling fool on earth, and if you don't come down and stop this accursed mule, I'll be dead in five minutes. I'm raw as a beefsteak now."—She might as well have tried to stop a whirlwind, for by this time the shirt was split up to the neck in ribands about three inches wide, and the mule, mad with fright and the cracking of ribands, was going at the rate of a tornado. Finally the mule fainted and the man fell to one side, helpless as a little child and sore all over as a boil. His wife with difficulty lugged him into the house, where he lay for weeks. A circle of lint resembling a small milky way described the race-course around the house. At intervals during the remainder of his natural life the mule was subject to fits of vertigo, and could neither be ridden nor driven until they put goggles of darkened glass upon him; for the sight of anything white threw him into convulsions and set him madly racing again.

ROADS AND MUD.

away his slippers. Not he. When he took them off he put them under the fig tree beside his Sunday boots. In short he did not think she was specially created for the purpose of waiting upon him, and he wasn't under the impression that it disgraced a man to lighten a wife's cares a little. That's the reason Eve did not need a hired girl, and with it is the reason her descendants did.

A LITTLE MULE'S EXPRESSION.—A mule was trying to pull a load of lumber through the slough of mud at the James Street Bridge this morning. The load was large, the mule was small and the mud was deep. The driver encouraged the mule with prayers and gentle flatteries. He made a first effort, and then leaned against the breeching and rested. The audience on the Bridge lowered their umbrellas and held their breaths, but the driver simply said that when that mule's eye wore the expression it was then wearing. which to the front row on the Bridge seemed an expression of firmness, he would sooner think of asking the rocks of Gibraltar to move than to ask that mule to do something which he did not want to do.—A substitute for the mule was brought.—*Syracuse Herald.*

The Mile and the Knot.

The confusion in the public mind, and reflected most clearly in the writings of popular authers in regard to the difference between the mile and the knot, is astonishing. In the same article the knot and the mile is repeatedly compared as though they were synonymous terms. It is very difficult in regard to English steamers to find out what speed has really been made. A mile and a knot are by no means the same thing. A mile is less than 87 per cent. of a knot.—Three and one-half miles are equal, within a very small fraction, to three knots. The knot is 6082.66 feet in length. The statute mile is 5280 feet. The result of this difference is that the speed in miles per hour is always considerably larger than when stated in knots, and if a person forgets this and states a speed as so many knots when it was really so many miles, he may be giving figures verging on the incredible. When we hear parties say that such a vessel is capable of making 20 knots per hour we usually take the statement with a very large grain of salt, 20 knots is 23.04 miles per hour, a speed which very few vessels have made, and it is doubted by some who have had the best opportunity for making actual measurements whether any vessel has ever made 25 miles in 60 minutes. What, then, shall we think of a person who reports that some of the English torpedo boats have made as high as 24 or 25 knots? Twenty-four knots are over 27½ miles per hour, and twenty-five knots are upward of 28¾ mil- an hour.

THE FIRST OF THE PHŒNIX PARK EXECUTIONS.—Joe Brady, who, on the 6th of May, 1882, killed Lord Frederick Canvendish in Phœnix Park, acting under the orders of a secret society of which he was a member, was hanged Monday morning inside the prison yard at Dublin. A vast crowd of people, estimated to number ten thousand persons, gathered outside the prison yard to await the hoisting of the black flag that would announce that Brady had paid the penalty of his crime. At 8:03 a. m., the flag was hoisted; the people uncovered their heads, it is said, at the moment of its appearance. There was no disturbance, as there was a strong force of cavalry, infantry and police present to preserve order. It had been rumored that Brady's friends, after the hanging, would endeavor to excite a demonstration by parading an empty hearse through the city, and after the black flag was put up a hearse, followed by a coach with mourners, did appear on the scene, but was immediately warned away by the police. Brady died without making any statement in regard to the matter which had brought him to the scaffold. The next member of the "Invincibles" to be hanged is Daniel Curley, whose execution is fixed for May 18th. The execution of Michael Fagan is set for the 28th of May, and Timothy Kelly for the 9th of June.

than other denominations, and that without *much* water there was no remission of sins; that the Episcopal Church at one time claimed to be *The Church*. But thanks to a more liberal spirit, the walls of partition between denominations have fallen down, and Methodists are no longer contemned in the eyes of other Christians; that such men as Spurgeon have shown to the world, that in diversities may be unity and that Episcopacy now entertains far less of high-churchism than formerly. Mr. Rosebro did not want to be understood as an advocate for that sentimental sort of religion that would just as soon belong to one church as another; that esteemed every religious denomination as good as his own. For every man ought to love and uphold his own church with zeal. He simply meant that as there should be no schism in the body between members of the same body so denominational differences and feuds only dishonored the body of Christ, of which churches are all members.

The text from which the evening sermon was taken was in the 27th Chap. of Mathew, and 22nd verse. "Pilate saith unto them, what shall I do with Jesus which is called Christ?" Pilate, said Mr. Rosebro, was like a great many people. He knew and admitted that Jesus was a just man and yet for fear of the people, he compromised his position, and sent his name down through the coming ages as a weak, vacillating man, afraid to come out on the side which his conscience approved. The application was clearly drawn. If sinners will not dispose of this vital subject — Jesus of Nazareth — as becomes fallen creatures who have nothing else on which to rest for salvation, then, they must accept the only other alternative, that of being eternally lost. Both of the sermons were earnest, searching, and convincing. Want of space forbids a more extended report. We have given only an imperfect statement of facts as we remember them, and will just state that this people have been peculiarly fortunate in the procuring of such a minister as he promises to be. Mr. Rosebro fixed his first regular appointment here for Sunday, October 8th, at which time he will enter upon his work as Pastor for this Church.

Take a sample with you and solicit orders, and let it be a fair sample of what you have to sell. Visit the grocers at such a time of day when they are least likely to be busy, so that they can hear what you have to say concerning it. Let your price be reasonable—better sell low at first and raise after your trade is once established. Low prices create a demand which must be filled, no matter what the price.

HOW TO MAKE PRETTY WOMEN.—A celebrated beauty, whose complexion at sixty was fresher than that of our women at thirty, told me her secret this summer, and it was divided into two parts: First, she never used washrag nor towel on her face, but washed it with her hands, rinsing it off with a soft sponge. She used clear water in the morning, but white castile soap or very warm water at night, and, after drying it on a soft towel, she would take a flesh-brush and rub her cheeks, chin and forehead. Second, if she was going to be up late at night, she always slept as many hours in the day as she expected to be awake beyond the usual time. She finished her little sermon on beauty preservation by saying: "Soft water and sound sleep keep off wrinkles and spots, and girls should give more attention to this than they do, for

☞ There is one thing about sewing on buttons. A man may not be able to do the job so quickly as a woman, and he may miss the eye of the button and run the needle into his thumb nine jabs out of ten, but when he gets the task completed, and breaks off the thread with a jerk, you can be pretty sure that button will be on his pantaloons long after they are worn through at the knees.

Newspapers the Mightiest Teachers.

Prince Leopold, of England, whose recent marriage to Princess Helen, of Waldeck-Pyrmont, attracted so much attention, is evidently a young man of considerable sense.—He presided at the annual dinner of the Newspaper Press Fund in London, and in proposing the principal toast he spoke of the gentlemen of the press as the watch-dogs of civilization. Now, this was very handsome when we remember that only a few months ago, some of these watch-dogs of civilization were barking very largely against the proposal to pay this young gentleman a generous allowance out of the public treasury of Great Britain.

He truly said that "the direct social and political power of the press is a fact which we are none of us likely to forget for a day."—But he was right in putting even higher the educational power of the press, which he declared to be greatest of all.

Newspapers are the mightiest teachers of mankind to-day. The statesman, the clergyman, the lawyer and university professor find in the press not only an agent which carries their words to millions. but also a monitor which warns the world how much to believe. It is significant, indeed, of the change which has been wrought, to hear a prince tell the people that newspapers not only make them wiser, but keep them free.

LITTLE JOHNNY ON DOGS.—One time there was a feller bot a dog of a man in the market, and the dog it was a biter. After it had bit the feller four or five times he threw a close-line over its neck and led it back to the dog man in the market, and he said to the dog man, the feller did, "Ole man, dident you use to have this dog?" The dog man he luked at the dog, and then thot awhile, and then he said, "Well, yes, I had him about half the time and the other half he had me." Then the feller he was fewrious mad, and he said, "Wot did you sell me such a dog as thisn for?" And the old man he spoke up and sed. "For four dollars and seventy-five cents, loffle money." Then the feller guessed he would go home if the dog was willing. Uncle Ned, which had been in Indy and everywhere, he says the Mexican dogs don't have no hair on 'em. Golden Rules for the Young.

The person who first sent these rules to be printed says, truly, if any boy or girl thinks it would be hard work to keep so many of them in mind all the time, just think, also, what a happy place it would be at home if you only could:

1. Shut every door after you, and without slamming it.
2. Never shout, run or jump in the house.
3. Never call to persons up stairs or in the next room; if you wish to speak to them, go quietly where they are.
4. Always speak kindly and politely to servants if you would have them do the same to you.
5. When you are told to do, or not to do anything by either parent, never ask why you should or should not do it.
6. Tell of your own faults and misdoings; not of those of your brothers and sisters.
7. Carefully clean the mud or snow off your boots before entering the house.
8. Be prompt at every meal hour.
9. Never sit down at the table or in the parlor with dirty hands or tumbled hair.
10. Never interrupt any conversation, but wait patiently your turn to speak.
11. Never reserve your good manners for company, but be equally polite at home and abroad.
12. Let your first, last and best friend be your mother.

Their language was grammatical, their dress was faultless; one of the males was a clergyman.

☞ "Mama, dear," said a girl just in the flush of early womanhood," I have something to tell you: George has proposed and I have accepted." "My child! I cannot think of you disgracing yourself. George is not a suitable match for you. Besides this would make him one of the family and he would pay no more board." Thus will be seen the incompatibility of a boarding-house girl falling in love with one of the boarders.

The Fox and Hare.

A Fox who was gamboling about had the ill luck to fall over a cliff, and as he lay on the ground, unable to rise and suffering great pain, along came a Hare.

"Well," said the Fox as he looked up, "the tables are turned. I am your bitter enemy and have often pursued you with intent to murder, but now I am helpless and can take your revenge."

"Do you expect me to kill you?"

"Naturally I do, and I ask the favor that you kill me with a club instead of slowly torturing me to death by singing: "Only a Pansy Blossom."

But the Hare determined to heap coals of fire on his head and prove her own forgiving spirit. She therefore gave him water and food and nursed him until he was quite able to take care of himself. The very next day after they separated the Hare was crossing a field Ahen she found herself pursued by a Fox.—wfter running a long distance she was overtaken, and as she was knocked over she recognized in her assailant the very Fox whose life she had saved.

"Why, you are the Fox whom I nursed?" she cried out.

"Is that so?"

"Of course it is! How could you fail to recognize me!"

"Well, fools look so much alike that it is hard to tell who from who. For fear of making a mistake I shall eat you and let the next one go."

COMMISSIONER'S SALE

—OF—

POCAHONTAS LANDS!

PURSUANT to a decree of the Circuit Court of Pocahontas county, rendered at the October term, 1882, in the chancery cause of William D. Moore's administrator vs. Wm. D. Moore's heirs and als., the undersigned Special Commissioner, will proceed, in front of the Court-house door of said county, on

Monday, the 2nd day April, 1882,

to sell at public auction, to the highest bidder, the following tract of land, containing about **200 acres**, lying in the dry fork of Elk River in said county, near or adjoining the lands of Joseph C. Gay and others, subject to the widow's dower in 71 acres, being the same land upon which the said Wm. D. Moore lived prior to his death. This is an elegant piece of land, is conveniently situated, and in the midst of one of the finest grass sections of the county.

TERMS:

Cash in hand sufficient to pay cost of suit and sale, and for the residue bonds in equal amounts, falling due respectively in nine, eighteen and twenty-seven months from day of sale, with good personal security, said bonds to bear interest from date—a lien to be retained as ultimate security.

R. S. TURK,
Special Commissioner.

I, John J. Beard, Clerk of the Circuit Court of Pocahontas county, W. Va., do certify that bond with approved security has been given by the Commissioner in the above cause.—Given under my hand, this 26th day of February, 1883. JOHN J. BEARD,

The Button Dodge.

He drifted into Phil McGovern's saloon the other evening, whiped his forehead, felt around in his pockets, and said with a pleasant smile:

"Well, as it seems I have just one ten-cent piece left to-day I'll take a drink."

When the four fingers of Antioch nervet-angler had been secreted in his remotest recesses the consumer fumbled among his keys and laid something on the counter. As he did so he started and said, with a look of amazement:

"Great Scott! just look at!"

"I see it" said the barkeeper, scornfully regarding the alleged dime. "It's a suspender button. What of it?"

"Well, I didn't look at it before. I just felt it in my pocket, and I'm blamed if it didn't fool me. Ahem! I suppose you'll have to put this drink on ice until to-morrow. I'll drop in and fix it."

"Oh, of course you will. Here, take this," and the cocktail retailer handed over a needle and thread.

"What's that for?"

"Why, for you to sew on that button right now. Otherwise you might make a mistake

A Reckless Government.

When Lee invaded Pennsylvania hay was $17 per ton around Chambersburg. One day a Confederate forage-master drove out into the country with his wagons, and halting at a farm-house he asked if they had any hay to sell.

"I might spare two or three tons," replied the farmer.

"What is it worth?"

"Wal, being as you are enemies to the Government, I shall have to charge you $20 a ton."

"All right, I'll take all you can spare," said the officer, and he loaded up and made out his receipt and ordered on the rebel quartermaster-general for the money.

It was only after the farmer had discovered that he could get nothing that he explained:

"I don't keer so much for the loss of the hay, but it aggravates me to remember how mighty reckless them rebs was when I tucked on $3 a ton. They didn't even ask me to split the difference."

☞ Æsthetic wife: "Dearest, I'll see that your grave is kept green—but not one of those horrid bright greens. A nice olive gray green with an old bronzed tombstone will look too awfully lovely for anything."

For answer she raised her pure, sweet face to his, and placed a large three-for-fifty-cents kiss on his innocent Wabash avenue lips.—*Chicago Tribune.*

"Guilty, but Drunk."

Capt. Henry's misadventure recalls a story which went the rounds twenty-five or thirty years ago, and is old enough to be new. It illustrates the embarrassment which a glass too much sometimes occasions the best of men. There lived in Georgia, says Col. Bradbury, whom Burton credits with the narrative, a Circuit Judge by the name of Brown, a man ability, of integrity, and beloved and respected by all the legal profession. But he had one fault. His social qualities would lead him, despite his judgment, into occasional excesses. In traveling the circuit it was his habit, the night before opening court, to get "comfortably corned." In a certain county town, one day, a tough citizen was arraigned on a charge of stealing. After the clerk had read the indictment to him he put the question:

"Guilty or not guilty?"

"Guilty, but drunk," answered the prisoner.

"What's that plea?" exclaimed the Judge, who was half dozing in the bench.

"He pleads guilty, but says he was drunk," replied the clerk.

"What's the charge against the man?"

"He is indicted for grand larceny."

"What's the case?"

"May it please your Honor," said the Prosecuting Attorney, "the man is regularly indicted for stealing a large sum from the Columbus Hotel."

"He is, hey? and he pleads"—

"He pleads guilty, but drunk!"

The Judge was now fully aroused.

"Guilty, but drunk? That is a most extraordinary plea. Young man, you are certain you were drunk?"

"Yes, sir."

"Where did you get your liquor?"

"At Sterritt's."

"Mr. Prosecutor," said the Judge, "do the favor to enter a *nolle prosequi* in that man's case. That liquor of Sterritt's is mean enough to make a man do anything dirty. The court got drunk on it the other night and stole all

They Didn't Advertise.

Mary had a little lamb; its fleece was white as snow; it strayed away one pleasant day where lambs should never go. And Mary quickly set her down, and tears streamed from her eyes; and never found her lamb because she did not advertise. Mary had a brother John, kept a village store; and set him down and smoked a pipe and watched the open door. And as the people passed along and did not stop and buy, John simply sat and smoked his pipe and blinked his sleepy eye. And so the sheriff closed him out but still he lingered near, and Mary came along to drop a sympathetic tear. How is it sister, can you tell, why other merchants here, "sell out their goods so readily and thrive from year to year?" Simmons, of the Times office and the latter by Hon. A. D. Williams. Mr. Simmons raised eleven pumpkins on one vine averaging 50 pounds in weight. Mr. Williams raised two wagon loads from one packet of seeds. The varities of the two pumpkins are the "Chilli Squash" and "Mammoth Squash." When it comes to big cattle, big poultry, big vegetables, big fruit, in fact big anything, we reckon Pocahontas county takes the lead.

How's this one? Frank Jackson, who lives near Clawson, yesterday brought us a radish, the like of which has probably never been seen in the temperate zone. By actual measurement it was sixteen inches long, 24 inches in circumference and weighed 9½ pounds. Mr. Jackson reports others just as large on his place which are perfectly sound and very tender. We have every reason to believe that this one is in the same condition. It was raised on Thorny Creek Mountain.

Monster Turnips.

A. D. Williams brought three turnips to THE MESSENGER office this week raised on the land of the Mt. View Orchard Co. that will come pretty nearly taking the cake when reports from other sections are all in. The three weighed 11 pounds the largest tipping the beam at 4½ pounds. They are of the Red Top Globe variety and are the handsomest turnips we have ever seen, smooth skinned perfectly solid and beautifully colored.

The turnips were sown the middle o August in a cornfield; no fertilizer wa

ter and brighter every day and should find a place in every home regardless of politics.

A Texas editor refuses to publish obituary notices of people who in life failed to subscribe for his paper and gives this reason: People who do not take their home paper are dead any-way, and their passing away has no news value."

The local ground hog seems to be working overtime these days doping out the weather. The county court would do well to start the "steam roller" after him. It has also been suggested that Billy Sunday's coming to Wheeling had something to do with the general atmospherical disturbances. Billy is advertised for six weeks in West Virginia.

What do you think of a man who will state upon oath that he is a law abiding citizen and during the course of the same examination say that he sold a dog on Sunday?

An Old Time Arm.

Dest Hurt, son of Ira Hurt, who lives on lower Piney, in this county, is the possessor of a rifle which has considerable local history. The gun was manufactured by Joseph Carper, at a date which is not now definitely known, but which is known to have been some time prior to the outbreak of the civil war, at which time Carper was known as one of the most efficient gunsmiths is the country, a reputation which was well deserved, judging from the materials and workmanship displayed in this specimen, which is to-day doing as good service as when it was first put to use. Not only is the material of the best quality, but the silver mountings and trimmings show its makes to have been possessed of more than ordinary artistic taste. That its good qualities were appreciated in a day when a gun had to prove its merits, is shown by the fact that it was awarded the first prize without question at a fair held at Salt Lake, now Roanoke, Va., before the war, but the exact date of whic is not available.

In the course of time the rifle found its way into the family of the late "Fud" McGinnis, of this city, where it did faithful service for a long time, finally passing into the possession of the family of General Alfred Beckley, in whose possession it remained until upon one occasion Web Beckley, son of the General became involved in a fracas in the course of which he received a blow on the head from the gun, which his antagonist had managed to get temporary possession of, and which almost terminated its existence. Following this episode, the gun was disposed of by the Beckley family to Ira Hurt, from whom it his descended to his son, the present owner, who states in substantiation of the claim that its shooting qualities are still unimpaired, that in a shooting match in which he recently participated, he carried of eight out of nine turkeys which were contested for.

Some of our older citizens still remember Carper, the maker of the gun in question by a spirit which demanded perfection in every article produced by him, the consequence being that the products of his gun shop were much in demand, and were held in high esteem by those so fortunate as to possess them. In addtion to his skill as a gunsmith, Carper was an excellent tanner, as well as an expert performer on the violin.—Raleigh Register.
